HELD FROM 2ND TO 4TH OCTOBER IN MILAN, 18 SPANISH TANNERIES WILL BE SHOWCASING THEIR CRAFTSMANSHIP, INNOVATION, CREATIVITY AND SUSTAINABILITY THROUGH THEIR COLLECTIONS.

The outstanding dedication of the Spanish industry towards organic sustainability is present today in the articles produced by the Iberian tanneries as well as integrated within their corporate goals, working alongside the foundational values and principles of the Spanish tanning companies, namely passion for one of nature's most unique creations, originality, creativity aided by latest technological advances.

The legacy of the historical background of the Spanish companies prevails today as strong as it has done for decades, yet their presence, through their articles is more global than ever before. The tanning industry in Spain is no longer a labour intense craft, a mere supplier of semi or elaborated leathers, but a field of unique expertise which has joined forces with the fashion industry, accessories, automotive industry within others.

Under the motto Natural Sustainability, the 18 Spanish enterprises open a new chapter in the history of leather.
